**Weight: 250-300g**

## Newdecor 3D Panels Features

Moulded of plant fibre and pulp, our 3D Panels are eco-friendly, light-weight and paintable. The raw material can be fully recycled. It is only 250g-300g for the standard 500X500mm panels and easy to be glued on the even wall or ceiling surface. The raw panels are off white and they can be sealed, primed and painted by any colour as your designing.

## Applications

Residential interior feature wall and ceiling-lounge, bedroom and studying room, etc  
Commercial interior feature wall and ceiling- hotel accents, apartment foyer, restaurant, night clubs, office reception, meeting room and retail shops, etc.

## Installation

The installation is as easy as gluing wall paper. Please refer to our installation manual for the details.
