Material

Newdecor privacy screens are made of MDF (medium density fibreboard) or PVC (Polyvinyl chloride) by Computer Number Control machine (CNC).

Both **MDF** and **PVC** panels are mainly used for interior screens, wall divisions, feature wall or feature ceiling for the residential and commercial projects. They can be pre-finished by white PU paint and repainted into any colour as you wish. More finishing options are available, i.e. gold coated, silver coated, metal coating etc.

PVC panels can be used for both interior and exterior projects. They are not affected by termites, rot or rust. They come with raw white or black surface and water resistant.

Size

The standard size of MDF screens is 600mm (L) X1200mm (W) X 12-15mm (T)

Or customized up to 1200mm (L) X2400mm(W)X 7-25mm(T)

The standard size of PVC screens is 600mm (L) X1200mm (W) X 12-15mm (T)

Or customized up to 1200mm (L) X2400mm(W)X 7-20mm(T)

Patterns& Customization

We normally have 6 patterns available in Melbourne and we can customize your design. (minimum order required, POA, leading time is around 6-12 weeks)

Installation

Both PVC and MDF panels are installed by screws, rail channels, liquid nail or suspended by metal rod etc.
